

Rubén Wilmer Quispe Cárdenas

Full-Stack Developer

rwquispec@uni.pe | (+51) 921 761 005

[LinkedIn](#) | [GitHub](#)

I'm passionate about technology, I studied Telecommunications Engineering, that knowledge allow me to understand how Internet work and research new technologies about the smart network, I believe that coming the day when all devices are connected and people will have their own IPv6, that will allow identify and consuming services online.

TECHNICAL SKILL

Node.js
Oracle DB
MongoDB

CSS
Typescript
SOAP

Javascript
React
XML

HTML
Redux

GraphQL
REST

EXPERIENCE

ENTEL

Lima, Peru

Develop Full-Stack CRUD platforms to handle data related to telecommunications sector like network inventory, management of projects, office tracking. Support and maintenance of Apps in PHP, REST integrations, data extraction, network KPIs analysis.

Full Stack-Developer

2020-Current

- Reduced the time of installation of services Fiber Optic/MMOO by tracking contractors in real time, deliverables in real time, troubleshooting and configuration of devices (Routers/Switches).
- Centralization of the data network (devices) and monitoring the utilization of Fiber Optic/MOOO links to implement projects of bandwidth capacity increases.
- Technologies: Node.js, React.js, Python, Mongo DB, Oracle DB, REST, Sockets, PHP.

ICETEL

Lima, Peru

Built frontend interface and backend for an application in Node.js, this application needs to connect to network equipment manager to extract data in real time from equipments like routers, switches, antennas using XML NBI (North Bound Interface).

Developer

2019-2020

- Automatization of connection to devices (router/switches) to get information in real time of interfaces enabled configuration and network status.
- Integration with network equipment manager (XML NBI) and develop a dashboard with all information customized.
- Technologies: Node.js, SOAP, REST, Oracle DB.

EDUCATION

National University of Engineering

Lima, Peru

Bachelor of Telecommunication Engineering

2013 - 2018

ADDITIONALS

- Languages: Spanish (native), English (advanced).
- Founder at Promitia, a group that provides support to people that are starting a software development career.
