

# Renzo Quispe Cárdenas

## Full-Stack Developer

renzo.quispe.c@uni.pe | (+51) 910 534 820

[LinkedIn](#) | [GitHub](#)

I am passionate about technology, I am always aware of new trends, I am creative to provide solutions to problems, I like to automate processes improving workflow, I like to program in a way that anyone can understand, I always give the best of me to be able to feel proud of my work.

### TECHNICAL SKILL

NodeJs  
Nest.js  
ReactJs  
Typescript

HTML  
CSS  
Javascript  
REST

PostgreSQL  
MongoDB  
Docker  
Python

### EXPERIENCE

#### UNCODEIT

Lima, Peru

Develop Full-Stack CRUD platforms to handle data related to telecommunications sector like network inventory, management of projects, office tracking, all in Docker containers. Support and maintenance of Apps in PHP, REST integrations, data extraction, network KPIs analysis.

Full Stack-Developer

2021-Current

- Obtain data from the network manager to group them in a customized way in dashboard, send configuration commands to network equipment.
- Centralization of the data network (devices) and generation of inventory reports.
- Technologies: Node.js, React.js, Python, Mongo DB, Oracle DB, REST, Sockets, Docker.

#### INDRA

Lima, Peru

Built frontend interface and backend for an application in Node.js, this application needs to connect to network equipment manager to extract data in real time from equipment like routers, switches.

Developer

2020-2021

- Automatization of connection to devices (router/switches) to get information in real time of interfaces enabled configuration and network status.
- Develop dashboards with all information customized and automate processes, all in Docker containers.
- Technologies: Node.js, REST, PostgreSQL.

### EDUCATION

#### National University of Engineering

Lima, Peru

Bachelor of Telecommunication Engineering

2015 – 2020

### ADDITIONALS

- Languages: Spanish (native), English (Intermediate).
